Which countries are most affected?

How have the number of malaria deaths changed over time in **Sudan**?

Darker shading marks a higher number of deaths caused by Malaria. Select a country on the map to explore how the number of malaria deaths have changed over time.

As we can see in the figure above, Malaria deaths in Sudan have reached the peak at around 2500 deaths in 2003. This was discovered by clicking on Sudan's map in the dashboard and observing the chart on the right side of the screen.
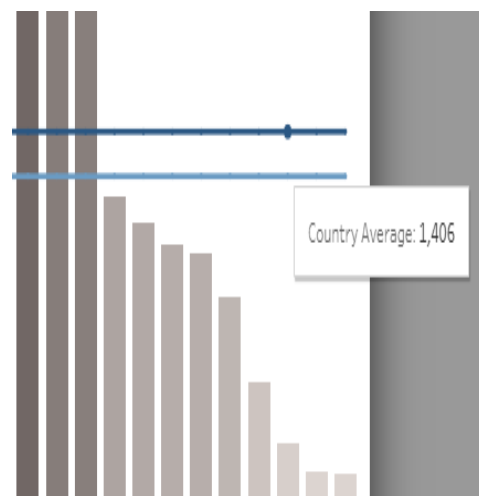

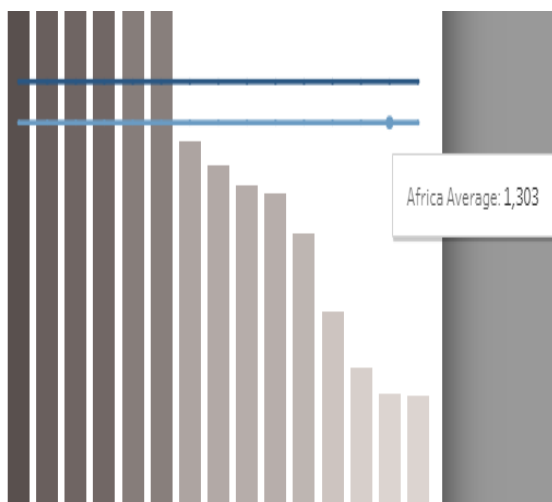

As Shown in the two figures above, Sudan's average deaths exceeds Africa's average deaths. It has 1406 deaths, while Africa has the average of 1303 deaths. I came to this conculsion by comparing the two averge lines found in the chart at right side of the screen.
